

```
Profiler< std::chrono  
::duration<double, std  
::ratio<1>> >
```

A diagram illustrating a template specialization or inheritance. A light gray box at the top contains the code for a `Profiler` template that takes a `std::chrono::duration` type. A dark gray box at the bottom contains the code for a `grasp_execution::core::TimeProfiler` template that takes a `Duration` type. A blue arrow points from the `TimeProfiler` box up to the `Profiler` box, indicating that `TimeProfiler` is a specialization or inherits from the `Profiler` template.

```
grasp_execution::core  
::TimeProfiler< Duration >
```
